How mass surveillance, sold as means to fight terrorism, is being used to terrorize populations and implement “invisible” totalitarianism

*“Everyone is entitled to a social and international order in which the rights and freedoms set forth in this Declaration can be fully realized.” – Article 28 of The UN*

*Declaration of Human Rights*

What do these words mean to you?

- “Totalitarianism”
- “Totalitarian regime”
- “Dictatorship”

How would you know you live in a “dictatorship” /  
“totalitarian regime”?

What would you do if you found out?

Turning upside down the most important international laws—those enshrined in the UN Declaration of Human Rights, the European Convention on Human Rights, as well as constitutions of most countries of this planet

## Specifically:

- Medical / scientific experimentation without consent, including performing medical procedures without consent
- Lack of respect for private and family life, including arbitrary and unlawful interference with privacy, family, home and correspondence
- Denial of fair trial
- Denial of effective remedy
- Denial of self-determination
- Denial of freedom of thought, conscience and religion
- Deprivation of property
- Denial of free choice of employment
- Deprivation of means of subsistence
- **In effect:**
  - Deprivation of life
  - Torture / inhuman or degrading treatment or punishment
  - And when such are done on a mass scale, that is called genocide

Since year 2014, living in 21st century Europe, I experienced **firsthand** all of these, including:

- Medical / scientific experimentation performed on me WITHOUT my consent
- Multiple unlawful interferences with my private life and correspondence
- Multiple denials of fair trial and effective remedy
- Multiple denials of legal counsel
- Multiple denials of free choice of employment
- Deprivation of my property
- Deprivation of means of subsistence
- Denial of self-determination

Medical / scientific experimentation performed on me WITHOUT my consent –

- Resulted in serious and permanent injury to my body, including **most intimate parts of my body** –
  - To this day multiple puncture wounds are visible on my left groin and directly related to them damage of the genital, urinary and nervous systems
- 9 reports from 8 different medical professionals corroborate all of the physical symptoms –
  - Computer Tomography (CT), Magnetic Resonance Imaging (MRI) including nerve MRI, Optical Coherence Tomography (OCT), 3 ultrasound (USG) tests including nerve ultrasound, and physical examinations performed by specialist physicians, including world-renowned specialist in examination of the nervous system
- Observed injury is **iatrogenic**, which can only take place in the case of a (failed) medical procedure
- I was **never in jail, never in hospital**, and these events took place 3 months into a new 2-year business contract, in flat I renting at that time

Multiple unlawful interferences with my private life and correspondence, including –

- **Removing and/or editing documents in court and prosecution cases I initiated** – most recently, package with documents addressed to the European Court of Human Rights (ECHR) was opened and documents which I included removed from that package
- Preventing me from obtaining comprehensive medical diagnosis due to **multiple misdiagnoses and refusals to conduct medical examinations** –
  - I was only able to conduct the proper medical examinations and establish comprehensive diagnosis after nearly 4 years by traveling to countries hundreds and thousands kilometers away from Poland, including Austria, Serbia, and India
  - Refusals to conduct examinations and medico-legal opinions took place in over 20 different cases
  - Misdiagnoses took place in at least 5 cases
- False information being spread about myself and these events

<http://not.surgery/>

Multiple denials of fair trial and effective remedy – so far all of the court and prosecution cases I initiated in regards to these events were quashed, through, inter alia –

- Removing and/or editing court / prosecution documents I filed
- Re-classifying notifications of a crime I filed and denying prosecution
- Issuing decisions based on articles from Wikipedia, without appointing medico-legal expert
  - Decision refusing to initiate an investigation was issued based on a Wikipedia article, which "law enforcement" attached to the case files, claiming that the sudden and permanent bodily injuries which occurred overnight–including damage to the genital, urinary and nervous systems, directly connected to the multiple puncture wounds in left groin–were caused by the candidiasis of the digestive system!!

<http://not.surgery/>

Multiple denials of fair trial and effective remedy (continued) –

- Denying existence of new and significant evidence, including
  - 9 reports from 8 different medical professionals, corroborating all of the physical symptoms, and clearly stating that the observed injury is iatrogenic
  - Communications from that time period, secured by IT forensics specialists, including **threats I received few days before these events** – “**may you never have any offspring**” – fulfilled as a result of what happened–i.e. permanent damage to the most intimate parts of my body
- Cover-up of crime lasting over 5 years already – "law enforcement authorities" continue to play deny game, at the same time committing numerous gross violations of procedural obligations and omissions

Multiple denials of free choice of employment and means of subsistence – through interference with electronic communication, attacks on my honor and reputation, as well as outright sabotage of contacts with business prospects through gang stalking / intimidation –

- I work in Information Technology (IT) since 1998
- I worked with companies from the US, UK and EU, well before and after I moved back to Poland from the USA in year 2003
- I worked remotely even before these events which resulted in permanent bodily injuries
- Since 2014, on each and every occasion, when I initiated business contact / applied for jobs where my experience closely or exactly matched requirements, after passing all stages of interviews, including technical interviews, at contract signing stage projects were suddenly quashed – through intimidation / gang stalking of my business prospects / attacks on my honor and reputation

Multiple denials of free choice of employment and means of subsistence (continued) –

- Each time after such act, I am contacted by a “recruitment” company (very often the same, different persons) “offering me a position” which, inter alia:
  - Is requiring me to relocate or work on-site full time—which, considering my injuries, is not possible, and most importantly is not how I work since the very beginning of my work in IT
  - Or is completely different in terms of technologies I work with and in result would require me to work at far less of what market rate is for my experience with technologies I actually do work with
- This pattern repeats over and over, resulted in multiple denials of choice of employment, closely resembles gang stalking and/or forced labor, and in effect is depriving me of means of subsistence

On a scale 1-10, how important would you rank the ability to promptly AND properly diagnose damage to multiple systems of your body, including most intimate parts of your body, find out exactly WHAT took place, efficiently prosecute such crime, and be able to fully restore your body?

What would you do if you found out that a medical procedure / experiment was performed on you without your consent, and for 5+ years you were refused on tenths of different occasions to KNOW, to EXERCISE your rights, AND to fully restore your body so you can live productively, at the same time being deprived of your property and means of subsistence?

<http://not.surgery/>

In the so called post-Snowden / post-Assange era, awareness of **mass surveillance** maybe nothing new to you.. but what if you found out that **these same technologies**, which were officially sold to the public as ways to prevent terrorism, **are being used in the exact opposite way**, i.e.:

- To **cover up crimes**, including medical / scientific experimentation without consent
- To **deny your right to live**, including preventing you from diagnosing your health condition
- To **deny your free choice of employment and means of subsistence**
- To prevent you from freely associating and cooperating with people who share your interests

Wouldn't an “almost” perfect, invisible dictatorship / totalitarian regime be one where grievous crimes are taking place, but awareness of such is kept away from you, and, most importantly, even when you found out, you are “systematically” prevented from doing anything to stop such, and to fix the destruction which these caused?

- I have never committed any criminal offense nor spent any time in jail – my criminal record is completely clear
- I was never admitted to any hospital
- These events took place in flat I rented at that time
- These events took place less than 3 months after the start of a 2-year business contract which I had to terminate immediately
- I spent tens of thousands of EUR for medical, legal and travel costs, and years of extra time and energy to investigate and document these events
- The cost of nerve restoration surgery alone is 17 000 EUR
- The cost of fully restoring all of the functions of genitourinary is even larger if at all possible
- Due to injuries which still need to be repaired, I can only work from home, with occasional meetings on site
- My electronic communication is being interfered with, false information is spread about these events, me and my work, which results in losses and, literally, inability to earn my living
